

TENSION ZIP by SUMMERSPACE[®]

THE SUMMERSPACE FLEXSHADE TENSION ZIP SOLAR SCREEN

is designed to be mounted horizontally or at an angle over skylights and pergola structures to provide a retractable shading solution.

Tension zip fabric extends and retracts smoothly and quietly from the headbox when you want to adjust your shade.

THIS FLEXSHADE TENSION ZIP SOLAR SCREEN SYSTEM is highly wind tolerant due to its side channel fabric retention system. It is available up to 16' wide x 20' long. They can be nested together to cover large expanses and can be controlled individually or as a group. The systems have an automatic rain sensor option to help prevent possible damage if accidentally left open during rain.

FEATURES

- Available up to 16' wide and 20' long
- Highly wind tolerant; The side channel retention track securely holds the fabric along its length preventing fabric billowing in the wind
- Extruded aluminum frame with stainless steel fasteners
- Sealed ball bearings for smooth, quiet operation
- A variety of mesh available
- Remote controlled motorized operation
